

DPSRU Innovation and Incubation Foundation signed a Memorandum of Understanding with Indian Angel Network (IAN) on 4th July 2022.

This partnership has been executed under the aegis of newly launched program BioAngels which is a unique collaboration between BIRAC, an enterprise of the Department of Biotechnology, and IAN; focused on supporting Biotech, Medtech, Healthtech, Pharma, Agritech & Cleantech startups — to raise their angel round from Angel Investors who bring deep domain expertise. BioAngels brings Money, Mentoring, and Market Access, echoing IAN’s genetics. It aims to fuel the ecosystem through interactions with high-quality investors and industry leaders, whilst emphasizing on a strong operational focus, frameworks, processes, and governance.

IAN is India’s single largest horizontal platform for seed and early-stage investing. Indian Angel investors invest in early-stage businesses which have potential to create disproportionate value and also provides constant access to high-quality mentoring, vast networks, the provide and inputs on strategy as well as execution.

DIIF, established in 2017, and being a BioNEST incubation Centre, strives to combine students, Faculty, Alumni and Industry Association to foster a culture of encouraging budding entrepreneurs in the University by providing right context and navigation with help of expert mentorship and education for commercializing research, industrial collaboration, administrative and infrastructure facilities at the university campus.

This partnership will be beneficial for DIIF incubates as well as aspiring entrepreneurs from DPSRU with the kind guidance and support of the DIIF & DPSRU family.
